### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with John Yirga on Nov. 28, 2005.

The application has been amended as follows:

In claim 3: delete "and an additional predetermined time period transpires" in line 3.

2. The following is an examiner's statement of reasons for allowance: The present invention is directed to an hour meter having a display for a garden tractor. Each independent claim identifies the uniquely distinct features "a plurality of segments on said display that are selectively displayed in a first optical state changes said optical state of a first segment from the first optical state to a second optical state when the timer reaches" and "a display drive incrementally changes the state of a remainder of the plurality of segments from said first optical state to said second optical states as additional portions of the predetermined service time interval elapse" in combination with the manner claimed. The closest prior arts, Jaw US 6,490,543 and Dwyer et al. US 4,688,117 disclose similarly features, however, either singularly or in combination, fail to anticipate or render the above obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
